

I, **Olasunkanmi Akeem Rasak**, am an AI Engineer with a strong foundation in mathematics, data science, and applied machine learning, specializing in building intelligent systems that combine predictive modeling, natural language processing, and data-driven decision-making. My expertise spans real-world AI applications in finance, e-commerce, and education, with hands-on experience designing, training, and deploying scalable machine learning models.

I hold a Bachelor's degree in Pure and Applied Mathematics from Ahmadu Bello University, Zaria, and a Master's degree in Artificial Intelligence and Financial Engineering. Over the last couple of years, I have gained extensive experience working on projects that involve sales forecasting, car price prediction, student performance analytics, forex trading strategy automation, hybrid car scanner automation, and document-based AI systems. I am also pursuing advanced professional development in Generative AI, backend integration, and predictive analytics through fellowship programs.

In addition to my professional work, I have a strong passion for teaching and mentorship, having guided high school and undergraduate students in mathematics, Python programming, and machine learning. I emphasize clarity, practical applications, and problem-solving, helping students develop both technical skills and analytical thinking.

My research interests focus on Retrieval-Augmented Generation (RAG) systems, large language models, time-series forecasting, and AI system deployment, with a commitment to ethical AI, model interpretability, and accessibility. Outside of work, I actively contribute to open-source projects, write technical blog posts, and explore innovative ways to deploy AI responsibly in emerging markets and Web3 ecosystems.

Date of Birth: 24th April

Place of Origin: Kwara State, Nigeria

Current Location: Adeshina Amusan Street, Off-Abule Egba, Lagos State, Nigeria

Languages: Fluent in English, Native in Yoruba

Technical Proficiency: Research Methodology, Digital Communications, Google Workspace, Research Tools, Microsoft Office Suite

Interests: Mathematics, Web3, Finance, Reading, Music
